TURNKEY SOLUTIONS **FOR ROLLING MILLS**

J.S ROLLING MILL INDUSTRIES Complete Rolling Mill Solutions

BRIEF PROFILE OF THE PROMOTER

Promoter: Mr. Jagjit Singh

Jagjit Singh is a very well known and respected personality in the field of hot steel rolling mill industry in India. He has been in the thick of the activities from the last 30 years in various ways. He has donned many caps in his 3 decade long career.

Throughout his career, he has crossed many professional hurdles with iron grit and determination.

He possess a midas touch when it comes to hot rolling mills. With the help of his highly skilled team, he has re-engineered and re-structured numerous rolling mills for optimum production capacity.

He is currently associated with many reputed projects and is responsible for successful design, execution and installation of many steel projects. His range of work enjoys a pan India presence with main concentration in Wada(Mumbai) and Jalna (Maharashtra) belts.

All the plants erectioned under the leadership of Jagjit Singh have a distinct record of setting production records in the particular category in minimum duration of time.

Having winged out as an independent consultant 8 years ago, he has shared his rich pool of knowledge with many steel manufacturers.

He has been involved in many ambitious projects that have been completed before deadlines. His work description includes designing, installation, erectioning, re-engineering and operation of hot rolling mills.

He has worked relentlessly, tirelessly in the field of TMT/QST Re-bar rolling mills for a span of more than 30 years.

The one very interesting and admirable aspect of his career path has been that, there is not a single rolling mill in his entire career that he has erectioned, revamped that failed to achieve the targets. It is this enviable 100 % track record that makes him a hot favorite amongst the promoters of the TMT plants who are always more than willing to use his expertise to improve the productive performance of their respective plants and eliminate the existing flaws.

His efforts are continually in progress in this field and with every passing year his work is leaving an excellent impression that has generated a lot of good will in the market and benifitted large number of plants.

COMPANY PROFILE

J.S ROLLING MILL INDUSTRIES is a pioneering name in the field of hot rolling mill manufacturing segment with the manufacturing facility situated in Navi Mumbai, Maharashtra.

We are into the manufacturing of hot rolling mill machinery for the following types of plants

- 1.) TMT Re-bar Mills
- 2.) Wire-Rod Mills
- 3.) Section/Structure Mills

We are well equipped to provide complete turnkey solution to the steel industry in terms of conception, designing, planning, manufacturing, erectioning, installation and successful operation of high speed high production steel plants.

We are comprehensively equipped with the latest and sophisticated machinery in our plant to ensure easy handling and machining of complicated and heavy duty jobs with extreme precision and accuracy.

Our manufacturing units are being led by experienced personnel and qualified engineers who have comprehensive industry experience and who ensure that timelines are met while maintaining quality at the same time.

Our products enjoy a good market share and our name has become synonymous with high quality and long lasting durability which is visible in our entire range of products. The machinery manufactured by us have created an excellent reputation in the market on account of latest design and for use of highest quality of materials.

OUR STRENGTHS

- More than 35 years of experience in TMT bar rolling mill.
- Tie up with Turkey based company for latest international designs of rolling mill equipments
- World class manufacturing facilities
- More than 20 successful commissioning of rolling mills
- Local office in Dubai & Iran for providing prompt after sales service to clients in Middle East & GCC region
- Located in Commercial Capital of India-Mumbai
- Guaranteed most competitive price of rolling mill in India.

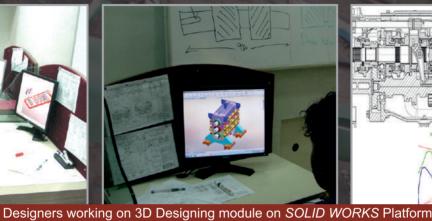

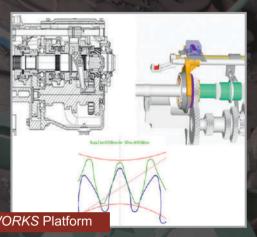

INFRASTRUCTURE

J.S ROLLING MILL INDUSTRIES is equipped with a very advanced manufacturing set up to assist us in manufacturing steel rolling mill machinery of the highest quality.

Our shop floor consists of the latest imported machinery which consists of horizontal table boring machines, Vertical Machining Centers, floor boring machines, gear hobbing machines, profile cutting machines, plano-millers, milling machines, VTL's Extra heavy duty lathe machines, drilling machines which ensures that all the jobs are manufactured with utmost speed and accuracy.

MILL STANDS

- 1. Housingless Stands
- 2. Vertical Stands
- 3. Hydraulically
 Shiftable Stands

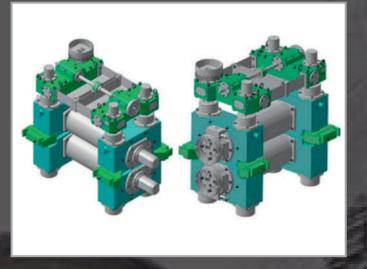

- 4. Multi-Row bearing Stands
- 5. Pre-Stressed Mill Stands
- 6. Conventional Open/Closed
 Top Mill Stands

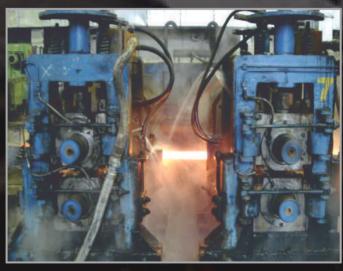

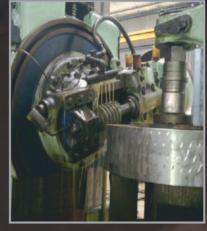

GEAR BOXES FOR ROLLING MILLS

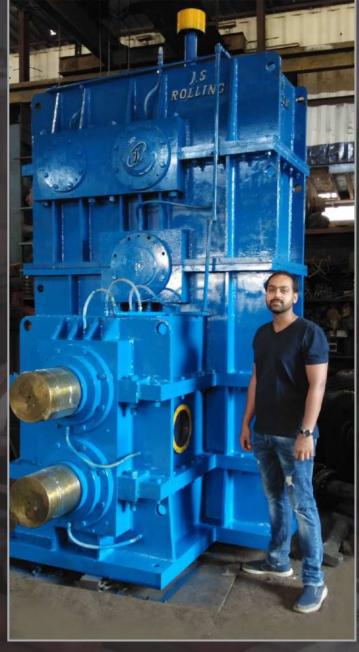

FEATURES

- Comprehensive Gear Manufacturing Workshop
- Complete designing of Gearboxes done using "KISSSOFT" Software
- Over 240 hours of cold trial is done on every gearbox
- Hardened & Grounded Gears used

SHEARS & CUTTING EQUIPMENTS

- 1. Start & Stop Dividing
 Shear Machines
- 2. Continuous Shears
- 3. Crank type Shear Machines
 (For Front Cutting & End Cutting)
- 4. Extra Heavy duty Cold
 Shear Machine
- 5. Hot Saw Machines
- 6. Billet Cutting Shear Machine

MATERIAL HANDLING EQUIPMENTS

J.S. Rolling Mill Industries is the first & till date the only company in Maharashtra to manufacture Twin Channel mechanism

- 1. Tail Braking Pinch Roll
- 2. Twin Channel Mechanism
- 3. Automatic Cooling Bed
- 4. Chain Transfer Mechanism
- 5. Fully Automatic & Semi-Automatic **Bundle Tying Machine**
- 6. Hot Charging Conveyor Systems

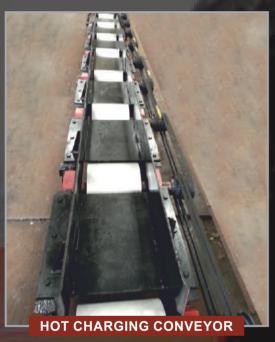

CHAIN TYPE BAR BENDING MACHINE

- Extremely low cost of ownership
- Reduces labour in the yard by 50%
- Return on Investment (ROI) within 3 months
- Very simple to operate
- Bending capacity of 20 ton/hr
- Only Single operator is required for complete bending operation

SIDE BEND TYPE BAR BENDING MACHINE

ADVANTAGES

- It can bend 10 nos. bundles at a time of 100kg each
- Option of PLC/Manual type
- Bending Capacity of 50 Ton/Hr can be achieved with a single machine
- Single operator can handle the complete bending operation
- Speed can be varied by adding VFD drives
- Guaranteed maintenance free operation for a period of 5 years
